

5 OCTOBER 2020

# ClipperData and Kayrros Announce New Partnership

## The first joint product targets U.S. Gulf Coast storage

### NEW YORK AND PARIS

---

ClipperData and Kayrros are joining forces to provide deeper insights into global energy market fundamentals.

Kayrros, the leading provider of information on oil production, storage and refining worldwide, is entering into a partnership with ClipperData, the leading provider of waterborne oil flow information. The first joint product offered to the market targets U.S. Gulf Coast storage. The two companies have exploited the interdependency of storage and flows of imports and exports to provide the most timely, accurate and comprehensive assessment of U.S. inventories and refiners in the heartland of the region's oil industry.

The product provides commodity investors with unrivaled precision on the U.S. crude oil balance with respect to EIA numbers ahead of the market.

"Flow drives storage, and storage drives flow," said Matthew Smith, ClipperData's VP of market research. "We are thrilled to be able to use the Kayrros data, the gold standard for onshore storage, to gain and provide better market intelligence."

"Storage drives price," said Augustin Prate, product manager at Kayrros. "This partnership with ClipperData unites two market leaders to deliver the best possible product for traders taking fast and critical decisions."

Kayrros will be participating at ClipperView, ClipperData's bi-annual event held on October 8, to share insights on the new offering. Both companies invite anyone interested in a free trial or additional information to contact Kayrros or ClipperData directly.

## About

---

### ABOUT CLIPPERDATA, LLC

ClipperData, headquartered in New York City, holds exclusive partnerships with the U.S. Customs & Border Patrol and Inchcape Shipping Services, the world's largest port agent. ClipperData offers the industry's most comprehensive database of waterborne – oceangoing, inland barge, ship-to-ship, and floating storage – flows of all crude oil and petroleum products worldwide. ClipperData delivers unrivaled real-time transparency: by ship, grade, API gravity, volume, load/discharge port and dock, along with consignee information. For more information, visit [www.clipperdata.com](http://www.clipperdata.com).

### ABOUT KAYRROS

Kayrros is the leading global asset observation platform built on fundamental science, strong R&D, and leading technology. Harnessing satellite imagery and multiple sources of unconventional data with machine learning, natural language processing, and advanced mathematics, Kayrros monitors and measures energy and natural resource activity worldwide. With access to data on more than 200,000 industry assets, Kayrros customers track individual or multiple assets in configurable proprietary or collaborative workflows to analyze industrial and environmental performance for maximum insight and optimal operational and financial decisions. For more information, visit [www.kayrros.com](http://www.kayrros.com).
